

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph beginning on line 4 of page 6 as follows:

As best shown in FIG. 4, the handle 14 includes a pair of outwardly extending guides ~~[[70]]~~ 71 and ~~[[72]]~~ 73 adjacent one end 74 of the handle 14. These guides 70 and 72, furthermore, are axially slidably received within the slots 56 and 58, respectively, on the lint roller support 12.

Please amend the paragraph beginning on line 8 of page 6 as follows:

The cooperation between the guides ~~[[70]]~~ 71 and ~~[[72]]~~ 73 and the slots 56 and 58 on the lint roller support 12 enables the handle 14 to be axially slidably mounted to the lint roller support 12 between a first or extended position, illustrated in FIGS. 2 and 6, and a second or retracted position, illustrated in FIGS. 1 and 5. In its extended position, the handle 14 protrudes outwardly from the end 20 of the lint roller support 12 so that the handle 14 may be easily grasped and manipulated by the user when use of the lint roller assembly is desired. Conversely, in its second or retracted position (FIGS. 1 and 5), the handle 14 is at least partially contained within the interior of the lint roller support 12 for compact storage and/or transportation.
